

PGMS 10 Pro

Prisoner Management Software (PMS)

An absolute software application tailor made for prison management suited for custom requirements. Easy to deploy client application (kiosks) with centralized server based control & management system provides seamless operation capability. A unified network platform enables users (prison inmates), supervisors (wardens), and administrator (jailor) to effectively process information with secured database. Capability to generate reports in desired formats and allows access to soft copy or print out copy.

**Unified
Management
Platform**

**Secured
Data Flow**

**Security
Encryption**

**User Friendly
Graphic
Interface**

- Server-Client architecture supporting N number of Servers and N number of clients, optional on premise and cloud based server
- SQL Server based secured database, Windows OS based application development in C# dot net language or latest
- Highly secured encrypted database allows decryption only through PMS application. Low data transmission for remote access
- Multi-level access - Admin, Supervisor, User Access with profile creation support
- Web based Graphical User Interface (GUI) on premise with built-in dashboard, English & Hindi Language support
- Intuitive & user-friendly GUI design requiring minimum training for simple & error free operations for Admin, Supervisors and Users
- Master-Transaction-Report architecture supports customized reports in Excel & PDF formats. Allow search filters based on prisoner, jail, user profiles etc. for ease of access of reports
- Integration with touch based monitors for easy access and usage of PMS in Kiosks and AIO desktops with inbuilt touch screen monitors
- Thermal Printers or other printers can be installed in kiosks and integrated with PMS for customized format report printing
