Guard Patrolling Management Software :

- Desktop based application designed to use guard patrol monitoring system centralized or locally
 - Easily deployable on multiple operating systems such Windows, Linux, macOS
 - Durability and Robustness: Integration of reliable and durable devices suitable for all environments, reducing replacement needs
 - The software enables enrolment of guard tag and fingerprint, check points creation and multiple reports through software
 - Pre-set Patrol Routes: Efficiently plan and optimize security coverage with customizable patrol routes
 - Abnormal Event Record: Easily document and report unusual activities or incidents during patrols
 - Analytical Reporting: Generate detailed reports to quickly evaluate the performance of security personnel
 - Ease of Operation: User- friendly design for easy operation minimizing training and errors
 - Task Setup: Supports Route Setup, Checkpoint Setup, Guard Setup, Schedule Setup
 - Reports: Ability to apply search filters and generate multiple reports in desired formats for audit needs
 - Real-Time Monitoring: Enhance safety with real time tracking of guard location for immediate response from GSM GPS based guard monitoring portable batons
 - Integration: Provision available with database interface and hardware SDK to develop applications for integration
- **Other Capabilities:**
- Add and delete data from device
 - Make multiple route and check point setup by names
 - Make batch check points
 - Create schedule and plan for patrolling
